

Flexible Criteria

The following section provides evidence for the flexible criteria included in the TBL Certificate rubric.

Evidence relating to team collaboration, artifacts, and class participation is distributed throughout the portfolio because these elements were embedded across the workshop activities. This section identifies where that evidence can be found and provides additional evidence relating to facilitation, attendance, and professional communication.

Team Collaboration

Evidence of team collaboration is included throughout the Documentation of Learning, Use of Technology, Peer Review, and Public Sharing and Collaborative Development sections. During the module, I participated in team readiness assurance activities, application exercises, simultaneous reporting, gallery walks, and collaborative discussion. The WhatsApp exchanges also demonstrate that collaboration continued beyond the workshop through resource sharing, peer feedback, and support during portfolio development.

Artifacts

The portfolio includes artifacts from each stage of the learning process, including photographs of team activities, iRAT and tRAT questions, application exercises, simultaneous reporting, gallery walks, the complete LAMS sequence, peer feedback, lesson revisions, and collaborative WhatsApp exchanges. These artifacts are accompanied by captions and commentary explaining their connection to the module learning outcomes and my development of TBL knowledge and practice.

Class Participation

The Documentation of Learning includes photographs and screenshots demonstrating my participation in team discussions, application exercises, readiness assurance activities, gallery walks, and whole-class reporting. The timestamped photographs included under Attendance provide additional evidence that I was actively involved in collaborative workshop activities across all three days of the module.

Facilitation Skills

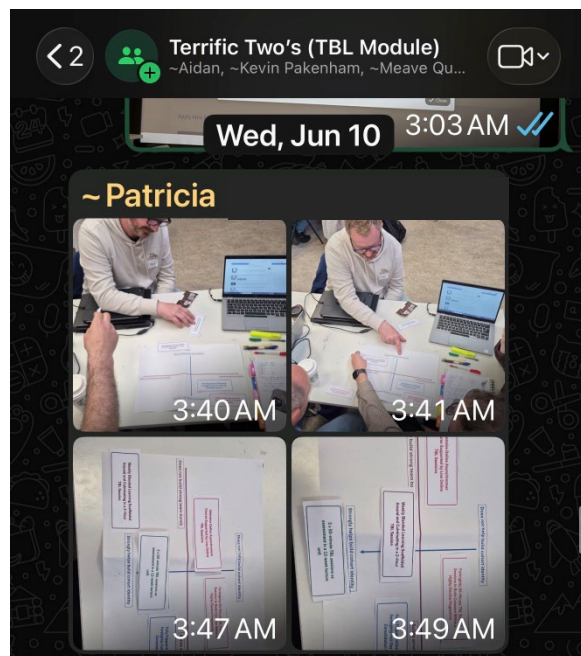

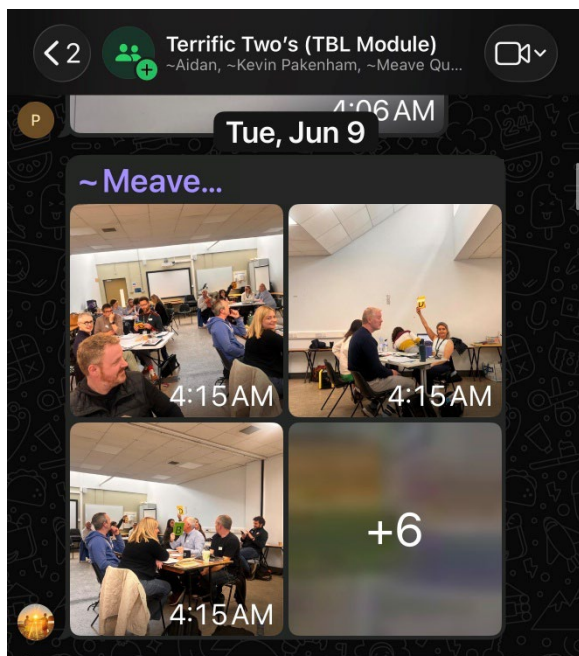

The linked video provides evidence of my participation in facilitating a TBL activity during the workshop: <https://youtu.be/EUB3oS6XE4A>. In the recorded activity, I supported participants as they engaged with the TBL lesson and application process. The video provides evidence of how I communicated the activity, interacted with participants, and supported progression through the learning experience.

Question Answering Skills

Not submitted as a flexible criterion, but the assessor may find and interpret evidence within this portfolio.

Attendance

The images below are timestamped for each of the 3 days of the module: June 9-11, 2026.

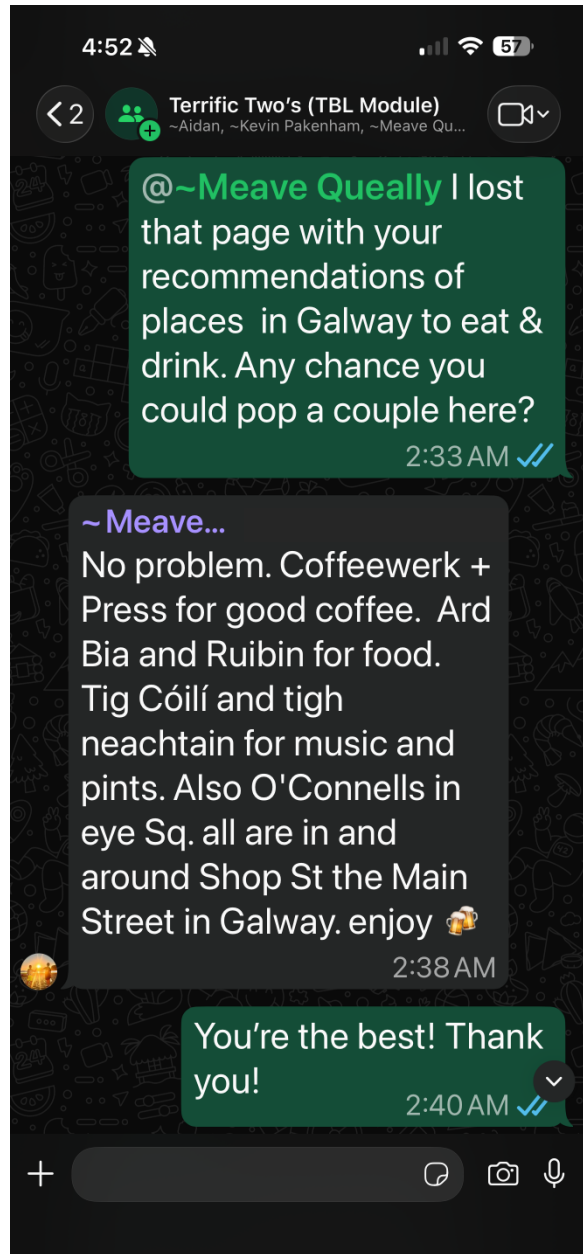

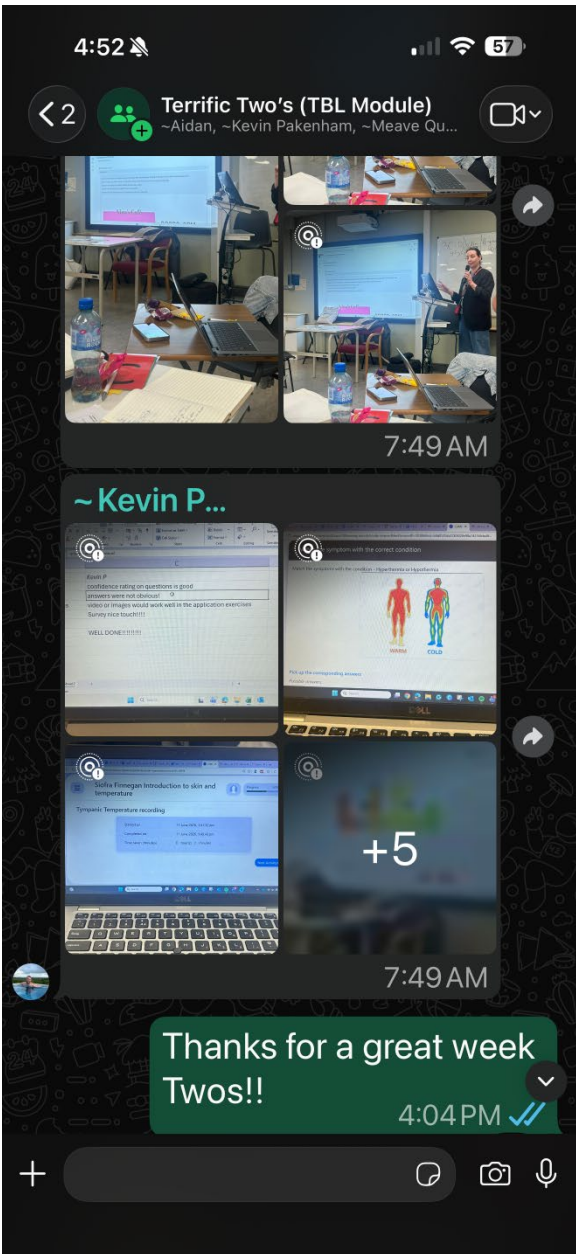

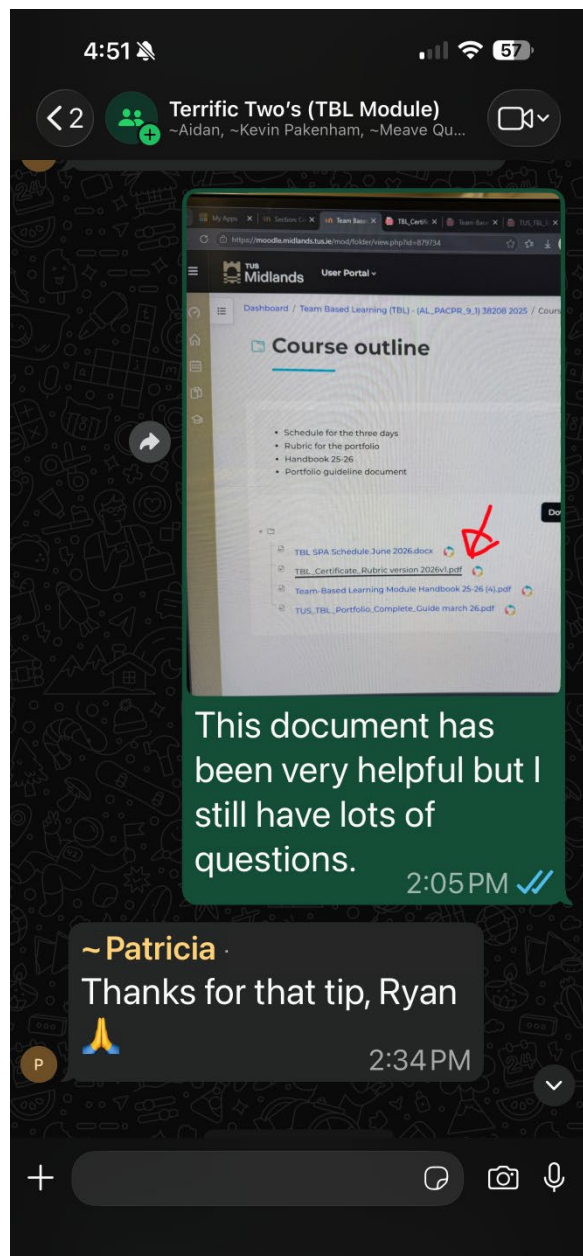

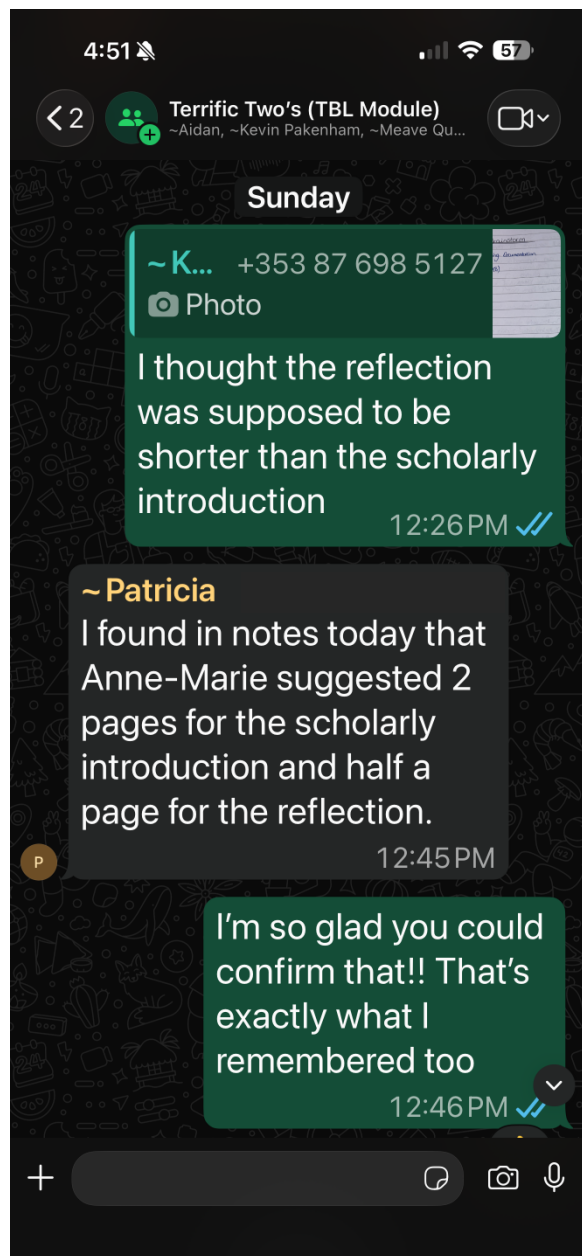

Timestamped images with me in them from all 3 days of the module

Professionalism and Communication

The following messages provide examples of respectful and professional communication with members of my TBL module team. The exchanges include thanking colleagues for the workshop experience, responding supportively to requests, sharing information, and helping clarify course and portfolio requirements. Additional evidence of professional communication is included in the Peer Review and Public Sharing and Collaborative Development sections, where feedback was requested, clarified, given, and received constructively.

Flexible Criteria Summary

This portfolio provides evidence for six flexible criteria: Team Collaboration, Artifacts, Class Participation, Facilitation Skills, Attendance, and Professionalism and Communication. Question Answering Skills is not submitted as a separate flexible criterion but the assessor may find evidence within this portfolio.
